ALTUS

Strategic Portfolio Management

Prioritise, evaluate and optimise initiatives, to turn strategic insights into actionable plans, and align your portfolio with what matters most to your organisation.

Prioritisation

Focus your resources on initiatives that deliver the highest strategic value and align with organisational goals. Use data-driven, configurable models to objectively rank and score projects, ideas, and investments.

Evaluation

Apply transparent criteria and visual comparison tools to consistently assess options. Measure risks and benefits to support informed, evidence-based decisions within streamlined workflows.

Optimisation

Maximise returns through active allocation and reallocation of initiatives. Scenario modelling ensures ongoing alignment with shifting priorities—so you can make the best use of your people, budget, and time.

Weighted scoring models
Objectively rank initiatives using configurable, strategic criteria.

Objective comparison
Evaluate initiatives side-by-side with transparent scoring and visual clarity.

Visual portfolio views
Gain intuitive, at-a-glance insights to compare and focus your portfolio.

Scenario planning
Model the impact of shifting priorities to guide strategic decisions.

Resource optimisation
Allocate resources effectively to high-priority projects for maximum value.

Governance integration
Streamline reviews and approvals with integrated governance workflows.

Only 16% of organizations are highly effective at strategic portfolio management, leaving the majority at risk of missed business value and wasted investment.

ALTUS

All Your Projects. One Platform.

Altus brings together project data and schedules from every tool and platform, giving PMOs a unified real-time view of their organisation. Purpose-built for Microsoft 365 environments, so you can focus on driving results, not chasing data.

Altus turns project chaos into organisational clarity

Gain organisation-wide visibility and insights with AI-enabled project delivery, embedded in your Microsoft 365 ecosystem. Your teams can move faster, align better, and deliver on the work that matters.

Built on the Microsoft Power Platform

Altus is built on the Microsoft technology you trust and integrates with the full Microsoft 365 ecosystem, including Copilot.

Data sovereignty

With Altus, all your data is secure in your own Microsoft 365 tenant, stored in Dataverse.

Seamless integration

With the task and scheduling tools your people are already using, and the enterprise systems you rely on.

Organisation-wide processes and visibility

For all work and projects underway so you reduce risk and make fast, confident decisions.

Feature Snapshot

Data security

Your data stays within your own Microsoft 365 tenant, no external hosting, and no compromises.

Rapid deployment

Altus deploys rapidly, so your teams can start delivering value in days, not months.

Clarity you can trust

Centralise data across teams and systems to provide insights, objectivity, and predictability at every level of delivery.

Fully supported

Altus is a complete solution backed by expert support. Implementation, onboarding, and ongoing success are all part of the package.

Cloud agility, IT control

Enjoy the benefits of regular updates while keeping complete control of when they are deployed to your environment.

Partner-powered delivery

Our global partner network provides local expertise, consulting, and customisation, so Altus fits your organisation, not the other way around.

AI-powered productivity

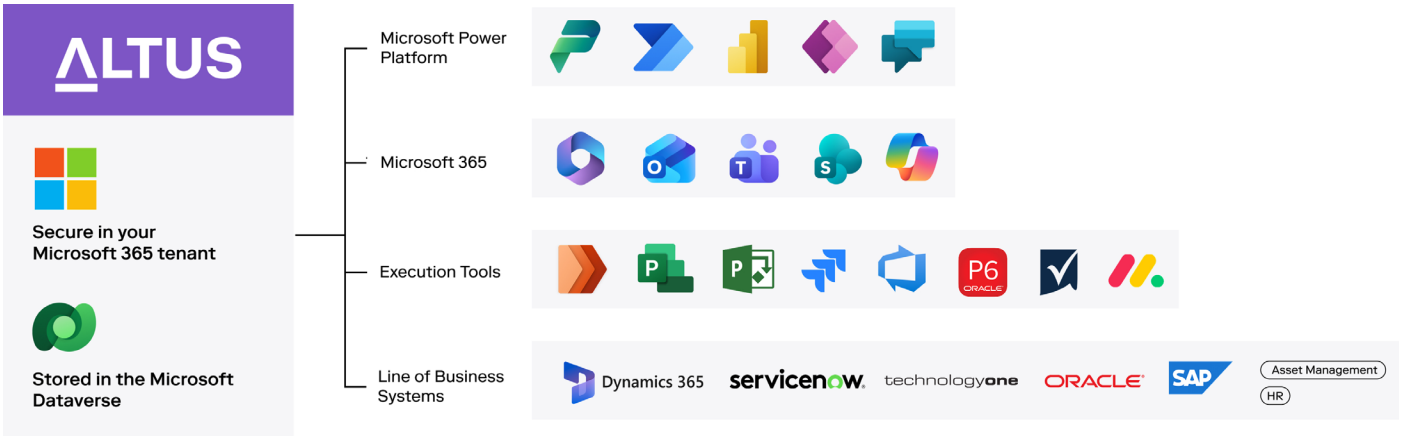

With Copilot and intelligent automation, Altus eliminates admin and helps teams focus on what matters.

Trusted by over 200 organisations globally

Maximise Your Investment

Altus is deployed securely in your Microsoft 365 tenant on the Microsoft Power Platform and utilises Model-Driven Apps, Power Automate Flows, Business Process Flows, and Power BI, all leveraging the Dataverse for data and analytics.

BRAM | Project Expert

Practical expertise in Microsoft Project, Project Online & PPM — from someone who helped build the product, and now helps organizations get real value out of it.

34 yrs	7 yrs	4 versions	Since 2010
in project management	at Microsoft HQ (US)	MS Project designed & managed	as Bram Project Expert

About

Since 1992, owner **Bram de Vries** has worked in project management — as a designer of project management software and as an IT project manager. Since October 2010, Bram Project Expert has focused on sharing Microsoft Project knowledge and hands-on experience: implementing Project Server/Online, reporting with Excel and Power BI, and advising on solutions that fit your existing — or improved — workflows. Bram is also an implementation partner for **Altus**, an advanced Project Portfolio Management solution for medium and large organizations.

Experience at a glance

1992 – 2010	**Project management & software design.** IT project manager and designer of project management software.
~7 years	**Microsoft HQ, USA.** Designer and project manager for 4 versions of MS Project and Project Server/Online.
4½ years	**Microsoft Services, Netherlands.** Project manager for enterprise IT projects.
2010 – today	**Bram Project Expert.** Implementations, coaching, reporting, automation and training — informed by insider knowledge of what does and does not work in practice.

What Bram can do for your organization

Implementations & coaching

Project Server and Project Online implementations, with hands-on coaching of planners — from setup to adoption.

Dashboards & reporting

Management dashboards and reports built with Microsoft Excel and Power BI, tailored to your portfolio.

Process automation

Aligning tools with your workflows: HR data (employees, contracts, leave) imported into Project Online, automatic project publishing — using VBA, VSTO and Power Automate.

Training

Classroom training as a freelance instructor for three renowned IT training institutes and the Hogeschool van Rotterdam (MS Project, Excel, Office, Windows).

Portfolio management

Implementation partner for Altus — advanced Project Portfolio Management for medium and large organizations.

Practical advice

Insider knowledge of what does and does not work in practice, and advice on solutions that align with existing or improved workflows.

Trusted by a wide range of sectors
